

Wkwkwkwkwk

Jojo is a boy who likes to laugh. He always add “ wkwkwkwkwk” at the end of his message. After a long time, he is tired to add “ wkwkwkwkwk” to his message. So, he ask your help to make a program that add “ wkwkwkwkwk” at the end of his message.

Format Input

A words S , the message that Jojo wants to send.

Format Output

The message after “ wkwkwkwkwk” is added. Print enter at the end of output. Output must be corresponding to the instruction.

Constraints

- $1 \leq |S| \leq 100$
- S only consist of uppercase or lowercase letter.

Note: $|S|$ means length of string S .

Sample Input (standard input)

```
Hello
```

Sample Output (standard output)

```
Hello wkwkwkwkwk
```

Sample Input (standard input)

```
Wew
```

Sample Output (standard output)

```
Wew wkwkwkwkwk
```

Wkwkwkwkwk

Jojo adalah orang yang suka tertawa. Ia selalu menambahkan “wkwkwkwkwk” pada pesan yang ia kirimkan. Lama-lama ia lelah menambahkan “wkwkwkwkwk” ke dalam pesannya. Karena itu, ia meminta bantuanmu untuk membuat program yang menambahkan “wkwkwkwkwk” di akhir pesannya.

Format Input

Sebuah kata S , pesan yang ingin dikirimkan oleh Jojo.

Format Output

Pesan akhir setelah ditambahkan “wkwkwkwkwk”. Cetak enter di akhir output. Output harus sesuai dengan instruksi.

Constraints

- $1 \leq |S| \leq 100$
- S hanya terdiri dari huruf kapital dan huruf kecil.

Note: $|S|$ artinya panjang kata S .

Sample Input (standard input)

```
Hello
```

Sample Output (standard output)

```
Hello wkwkwkwkwk
```

Sample Input (standard input)

```
Wew
```

Sample Output (standard output)

Wew wkwkwkwkwk
